

Duètte is a reversible, 78.7" (2m) wide, vinyl dance floor that is ideal for touring productions or semi-permanent studio and stage installations. Manufactured with a unique, woven glass fiber interlayer between its two outer vinyl layers, Duette's dimensionally stable construction inhibits expansion and shrinkage due to temperature fluctuation. This enables Duètte to resist rippling and waves as its laid out for easy installation. Its wide width also means that Duètte requires fewer panels with fewer seams to tape, which results in accelerated installation times.

Available in black/white or black/grey, this reversible dance surface provides a medium floor speed with a matte, non-skid finish: suitable for Ballet, Modern, Jazz or Hip Hop.

Composition:

Homogeneous PVC with woven glass fiber reinforcement interlayer

Nominal thickness:

0.047" (1.2mm)

Roll Size:

78.7" x 131.3' (2m x 40m)
